

The graph displays the ratio of the number of nodes in the network over time for various network sizes. The x-axis represents the 'Epochs' ratios' from 0.0 to 1.0, and the y-axis represents the 'Ratio of the number of nodes in the network' from 0.0 to 1.0. The lines represent different network sizes, with the top line (cyan) corresponding to the largest size and the bottom line (blue) to the smallest. All lines show a general upward trend, converging towards a stable ratio between 0.8 and 0.9 as the epochs' ratios approach 1.0.
